Safety Program Audit

Pre-Qualification Form (PQF) and Database Query

Field Audit

Safety Council Solutions (SCS) a newly formed joint venture of Contractor Safety Council of Texas City, Industrial Safety Training Council (SE Texas), and Safety Council Southwest Louisiana was formed at the request of some Owner/Operators who were formerly utilizing the NCMS contractor table top audit process. Our combined 100 years of industry experience, our proven history of cost containment, as non-profit providers, the 30 plus years our Directors have of direct control over their organizations and our ability to provide sophisticated enhancements was the basis for selecting us to provide these services.

Contractor Safety Program Monitoring:

SCS has established a solution for Owner/ Operators previously utilizing the services of National Compliance Management Services (NCMS) for contractor safety program qualification. Our solution allows seamless integration by incorporating the NCMS model for auditing, work flow, fee structures and data base management.

SCS recognized the need for enhancements as well as additional services and have added these as part of our ongoing customer service commitment. Reliability, accuracy and flexibility are key elements we understand and commit to in order to insure our system is user friendly and continues to meet our commitment to our Owner/Operator customers.

Experience:

- Safety Council Solutions has written over 4,000 Safety Program Modules approved by National Compliance Management Services (NCMS).
- Over 400 Contractors have been assisted through the NCMS process by SCS.
- A state of the art database with a highly qualified Information Technology (IT) provider committed to 24/7 support.
- The NCMS database has been incorporated into the SCS database. Additional training to use our database is not necessary.

Database Features:

- Password protected.
- Fields include contact information, OSHA Citations, OSHA Fatalities, Desk-Top Audit Scores, training status and Contractor Safety Questionnaire.
- Searchable contractor data, including contractor name, Federal Tax ID, Work Type, and City, State and Zip Code.
- Information easily downloads to Excel, Access, or Word.
- Owners have the ability to email directly to contractors from the system.
- Data input from contractors via mail or electronic submittal (CD or pdf file).
- Owner/Operator notification when Contractor has not updated their OSHA/EMR data.
- Customization of data as well as inclusion of the requirements set by our Owner/Operators. The information can be site specific or specific to a corporation or even a region of the country.
- Qualified IT provider committed to 24/7 support.

Audits:

- Performed by trained and qualified personnel.

- Normally completed within two-week turn around period.
- Scoring based on items completed from each required program defined in the required matrix.
- SCS will validate contractor submitted OSHA data against OSHA database.
- Ability to manage workload of up to 40 quality audits in a two week turnaround period.
- Automatic notification to Owner/Operator for contractors who fail to self report OSHA fatalities and citations annually.

Fees:

Fees are negotiable depending on extent of services desired. As a non-profit group with a history of quality cost and effective service, we will continue to assure that our services meet your needs and our fees are competitive.

Assistance:

Contractor Support is provided by Safety Council Solutions via on-line help with detailed, item specific help provided by a full-time Administrator. Phone support is available during normal business hours of Monday through Friday from 8:00 a.m. to 4:00 p.m. (central time).

SCS has its own Information Technology Resources, both internally and externally, to support and meet our customer's needs.

Special Services available for a negotiated fee:

- Hands on field audits
- A reciprocal Pre-Qualification Form (PQF) process and system is available.
